Creating Skills and Assistant for Chatbot

Skills are nothing but actions and steps. Steps are the subset of actions where conversations are built and Assistant is used to integrating skills.

The screenshot shows the IBM Watson Assistant web interface. At the top, there's a navigation bar with 'IBM Watson Assistant Lite' and an 'Upgrade' button. Below this, a 'Welcome to the new Watson Assistant' message is displayed with a 'Next' button. The main section is titled 'Create your first assistant' and includes instructions: 'Let's get your assistant up and running. Name your assistant, add a description, and choose a language. In following steps we'll gather more information, show you basic customizations, and give you a preview of what your assistant will look like.'

The form contains the following fields:

- Assistant name:** A text input field with 'Banking Bot' entered. Below it, a note states: 'Your assistant name will be kept internally and not visible to your customers'.
- Description (optional):** A text area with a character count of '128/128'. The entered text is: 'The Bot will be able to answer Customer queries like to create bank account, Loan queries and regarding general and Net banking.'
- Assistant language:** A dropdown menu with 'English (US)' selected. Below it, a note states: 'This is the language your assistant will speak.'

The bottom of the image shows a Windows taskbar with various application icons and a system clock indicating 12:38 on 06-11-2022.

Creating Current Account Action:

The screenshot displays the IBM Watson Assistant interface for configuring a 'Current' action. The left sidebar shows the 'Conversation steps' for the 'Current' action, which includes a step for 'What is your Company type?' with options 'Proprietorship' and 'Partnership', and a step for 'Please take the following Documents and approach the nearest branch.' with a 'Free text' input. The main area shows the 'Customer starts with:' section, which includes instructions on how to enter phrases and a text input field labeled 'Current'. A 'Preview' button is visible at the bottom right.

The screenshot displays the IBM Watson Assistant interface for configuring an 'Index' action. The left sidebar shows the 'Conversation steps' for the 'Index' action, which includes a step for 'How can I help You?' with options 'Loan Queries', 'Net Banking', and '+ 3', and a step for 'This step has no content' with a 'Go to action: Saving' button. The main area shows the 'Customer starts with:' section, which includes instructions on how to enter phrases and a text input field labeled 'Index'. A 'Preview' button is visible at the bottom right.
